

**CAMLOCK**  
SYSTEMS

**PRODUCT SPECIFICATION**

Series 7010

# SERIES 7010

**COMPACT ELECTRONIC PIN LATCH.  
INCLUDES AN INTEGRATED  
MONITORING SWITCH.**

## OVERVIEW

### Compact Latch solution for small enclosures.

This compact Electronic Latch allows controlled access to small enclosures with versatile mounting options. An integrated monitoring switch indicates whether the mechanism is locked or unlocked. Mode of operation can be changed securely in the field. **Recommendations of a suitable power supply and access controller can be provided on consultation.**

### Lock features

- Surface-mounted with multiple mounting options
- Settings can be changed in the field for convenience
- Low energy consumption
- Elongated holes for adjustable mounting
- Four counter sunk mounting holes

## TECHNICAL DATA
